

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

that it flew directly from one point to the other, but in coursing to and fro while searching for food it doubtless added hundreds of miles to its journey. Accompanying the original label is a clipping from 'The Fraternal Union,' Vol. I, No. 2, Bristol, R. I., Dec. 16, 1875, by W. J. Miller, in which it is stated:

"Captain Luther was master of the whaling barque Cachelot of Mattapoiset, Mass., and subsequently on the same voyage fell in with Capt. Edwards, and showed him the paper. Captain Edwards at once recognized it, and confirmed the date and other circumstances as stated."

We do not often have so authentic a record of the powers of flight and extended range of individuals of this well-named bird. For permission to publish it I am indebted to Prof. H. C. Bumpus, Assist. Director of the Brown University Museum.—FRANK M. CHAPMAN, *American Museum of Natural History, New York City.*

Another European Widgeon (*Anas penelope*) in Indiana.—Since recording the specimen taken in 1893, in the April number of 'The Auk' (Vol. XII, p. 179), I have secured another taken in the same State. This one, a young male, was killed on the Kankakee River marshes, near English Lake, Indiana, on the 7th of April, 1895. It was shot from a small flock of Baldpates by Mr. J. F. Barrell, who, at the time, was shooting about half a mile from me in the same marsh. He kindly presented me with the bird which I now have in my collection. This specimen makes the fifth recorded for the interior.—RUTHVEN DEANE, *Chicago, Ill.*

Record of a Third Specimen of the European Widgeon (*Anas penelope*) in Indiana.—I have recently examined a fine adult male of this Duck, at the office of the 'American Field' in Chicago. It was killed in the spring of 1881, or 1882, on the marshes of the English Lake Shooting and Fishing Club, at English Lake, by the late Samuel H. Turrill.

I am indebted to Dr. Nicholas Rowe, editor of above paper, for this interesting information. It is a little strange that our foreign visitors to this State should all have been captured in one locality, at English Lake, at different periods.

This specimen makes the sixth record for the interior.—RUTHVEN DEANE, *Chicago, Ill.*

The Old Squaw (*Clangula hyemalis*) in Colorado.—While this Duck occurs regularly in greater or less numbers on Lake Michigan in winter, and is occasionally found on the larger rivers and lakes of the adjacent States, I can find no record of its occurrence west of the Mississippi River. I am indebted to my friend, Mr. John B. Sibley, of Denver, Colorado, for information regarding the capture of a pair, male and female, which he shot on McKay Lake, sixteen miles north of Denver, on November 13, 1892.
